

[Co-Cane](#) is a cane for two that made me chuckle. I also like the product description from the designer, [Munire Kirmaci](#): “Inspired by the mutual support and dependability that gives a great sense of security within our relationships. Co-Cane aims to remind us how important it is to have someone beside us both in good times and in bad. **Warning:** Co-Cane may not be addictive but may cause a possible dependence. Use often and when needed.”
